

**JETView helps airlines reduce the cost of managing technical information and ensures essential data is kept more complete and up to date.**

Developed specifically for the airline industry, **JETView** enables airlines to:

- Significantly reduce the cost of managing aircraft information
- Gain quick and easy access to Aircraft Maintenance Manuals, Fault Isolation Manuals, Illustrated Parts Catalogs and other technical publications via an intuitive, web browser interface
- Search for and find information from data on millions of parts and thousands of maintenance procedures
- Improve compliance with the FAA's Airline Transportation Oversight System (ATOS) requirements
- Constantly expand the volume of data in the technical library, without any degradation in performance
- Customize and publish technical publications, avoiding high costs, delays and restrictions
- Do away with supplemental binders and stacks of temporary revisions

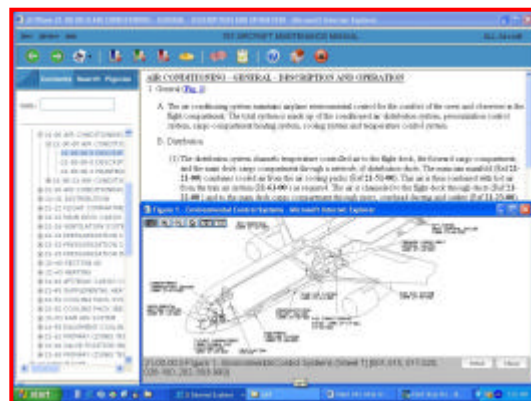

With the publishing process under your direct control, you can be sure that your technicians are using manuals that are always complete and up to date, accurately reflecting all configurations in your fleet.

The browser-based interface ensures that the **JETView** solution is affordable, maintainable and simple to use, with minimal user training required.

Provided as an in-house or hosted publishing service, JETView delivers immediate cost savings for all airlines, large and small.

### View

- dynamic navigation
- search capability
- aircraft effectivity filtering
- list of figures and tasks
- bookmarks
- session history
- graphics viewing (SVG, CGM, TIFF)
- change register
- feedback mechanism

### Publish

- ATA standard/SGML/XML
- ATOS management support
- AMM, FIM and AIPC
- policies and procedures manuals
