

Job Title	Software Developer
Reports to	VP, Development & Professional Services
Location	Ottawa, Canada
Job Type	Permanent

Stilo International plc, with offices in the UK and Ottawa, is a world leader in XML/SGML content processing technologies, supporting a global customer base in publishing, high-tech, government, aerospace and defense.

Our core technologies are the **OmniMark** programming language, a high-performance content processing platform; the **Migrate** cloud content conversion service that enables users to convert documents from proprietary formats such as FrameMaker, InDesign, RoboHelp and Word to XML formats; and **AuthorBridge**, a browser-based authoring tool for creating XML by providing an easy to use interface and converting to XML under the hood.

We currently have an immediate vacancy in our development and services team for a recently qualified **software developer**, based in the Ottawa office. We are looking for creative problem solvers who enjoy tackling a wide range of technical challenges. Important personal attributes include strong analytical skills, a solid theoretical foundation in the principles of computer science, the ability to work both independently and as part of a team, and a knack for learning new things quickly. Good communication skills are also important.

You will be working with an outstanding, specialist team of developers who are authorities in a dynamic field and also be dealing with customers who are themselves advanced users of content technologies. We emphasize team work and collaboration at Stilo.

Responsibilities

- Become proficient with OmniMark programming
- Build and maintain Migrate conversion pipelines using OmniMark
- Contribute ideas for the evolution of the Migrate content conversion portal
- Analyze sample input and develop conversion specifications and tailoring estimates for customers
- Use OmniMark in services projects, from time to time
- Build web interfaces

Skills and Qualifications

- University degree in computer science
- Solid theoretical foundation in computer science
- Familiarity with different types of programming language paradigms
- Experience with general purpose programming languages
- Familiarity with XML technologies (e.g. XML, XSLT, XQUERY)
- Familiarity with web technologies (e.g. Javascript, web toolkits)
- Familiarity with database technologies (e.g. relational model, SQL)
- Operating systems - proficient with the Linux platforms

SALARY: Competitive, based upon experience.

Applicants must be legally entitled to work in Canada.

Please respond with a covering letter, copy of your CV and details of current salary to careers@stilo.com
